L1 PREMIUM GOODS
20K
S T A N D A R D
20,000MM WATERPROOFING / 20,000G BREATHABILITY

20K STANDARD

Truly blending the worlds of fashion and function.

HOW IT WORKS

Evolving our definition of premium by incorporating 20K/20K as our standard level of waterproofing and breathability through out the vast majority of our line. Premium quality starting with a baseline of high quality weather protection at any price point.

WATERPROOFING & BREATHABILITY

Our technical, waterproof, breathable, windproof, 20k/20k stretch fabric solution exclusively available in the Theorem line.

20,000mm Waterproofing

10,000mm Waterproofing

DWR (Durable Water Repellent) coating

Made with fabric that moves moisture away from the body to keep you dry and comfortable.

20,000g Breathability

10,000g Breathability

Non-insulated garment, single layer, and wind-resistant.

Made with fabric that moves heat away from your body to maintain a comfortable body temperature.

LAYERING & TAPING

3-layer shell fabric is waterproof, windproof, and breathable. The fabric features a water-repellent finish, a waterproof/breathable membrane, and a lightweight knit interior. No lining. The 3 layers are bonded to become one lightweight fabric to protect you from the elements.

2.5-layer shell fabric is waterproof, windproof, and breathable. The fabric features a water-repellent finish, a waterproof/breathable membrane, and a partial mesh interior lining.

2-layer shell fabric is waterproof, windproof, and breathable. The fabric features a water-repellent finish, a waterproof/breathable membrane, and a tricot or mesh interior lining for added comfort.

All seams and areas with stitch lines are heat sealed with water-repellent tape.

Main seams and areas with stitch lines are heat sealed with water-repellent tape.

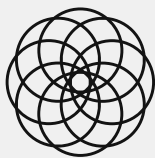

Made with yarn that stretches in both directions, crosswise and lengthwise.

Made with quick-drying fabric.

RECYCLED MATERIALS

RECYCLED MATERIALS

A work in progress, we've set a goal to work towards having a line completely made of only fully recycled fabrics in the near future. As we start this journey, our main goal is to do our part in reducing the industry's greater impact one step at a time.

ECO YARN LINING

The first step being the addition of (GRS) certified 100% recycled polyester found in our linings as well as our new high pile fleece, manufactured from used PET bottles. Using environmentally-friendly recycling processes, it does not require petrochemical raw materials and saves natural resources reducing the burden on the environment. We have also switched our nylon lining in 45 of our 48 styles to Ecoya® – a type of solution dyed yarn. Statistics show when generic textiles are replaced with Ecoya®, the release of CO2 and COD is greatly reduced while water and chemicals are also conserved. Such as water savings of 46%, COD savings of 67%, Coal savings of 64%, Chemical savings of 92%, CO2 savings of 63%, Electricity savings of 59%.

As part of our commitment to improving our environmental footprint we have entirely switched from C6 DWR containing hazardous PFC's (per- and poly-fluorinated chemicals) to PFC-free DWR on all our fabrics and styles that require a DWR coating. The importance of a cleaner textile process is fundamental in our journey to reducing our environmental footprint.

MENS FIT GUIDE

SKINNY FIT

The Skinny gives you a tight fit through the hips, thighs, knees, and calves with enough room to go over your boots.

REGULAR FIT

Traditional outerwear fit with room to layer, but not too loose. Relaxed through the hips and thighs with a regular leg opening.

SLIM FIT

Designed to be snug on the hips and thighs. Our slim fit gives you a fashion-forward look, tailored but not too tight.

RELAXED FIT

Designed to fit loose, with comfort in mind.

THEOREM

L1 PREMIUM GOODS

THE EXPERIMENT IN GRAVITATIONAL DISTORTION

This is our third season of Theorem, our approach to high performance functional outerwear. Heavily backed by our team riders - Theorem uses premium 3-layer 4-way stretch fabric to create the most functional, waterproof garments in our line.

NOVA.TECH

NOVA.TECH is L1 Theorem's waterproof, breathable, windproof, 20k/20k stretch fabric solution. Engineered to protect you from extreme mountain weather while providing the stretch and mobility needed to get where you are going in style and supreme comfort.
