L1 was founded on the principles of uncompromised vision and the pursuit of function, quality, and originality. At the heart of L1 lies a rebellious and unapologetic attitude. Defined by our team and cultivated by the brand — we merge our wide range of influences and backgrounds, resulting in a contemporary outerwear brand with a disruptive blend of fashion and function.

THE FIT INITIATIVE

L1 has been deeply committed to providing our consumers with refined optionality when it comes to fit. Knowing there are a broad spectrum of needs and preferences out there, we established these fit classifications to narrow the scope. Making it as easier to identify and choose the best possible L1 fit to suit any riding style.

TECHNOLOGY

WATERPROOFING & BREATHABILITY

Our technical, waterproof, breathable, windproof, 20k/20k stretch fabric solution exclusively available in the Theorem line.

20,000mm Waterproofing

20,000g Breathability

10,000mm Waterproofing

10,000g Breathability

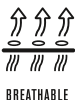

DWR (Durable Water Repellent) coating

Non-insulated garment, single layer, wind-resistant.

Made with fabric that moves moisture away from the body to keep you dry and comfortable.

Made with fabric that moves heat away from your body to maintain a comfortable body temperature.

LAYERING & TAPING

3-layer shell fabric is waterproof, windproof, and breathable. The fabric features a water-repellent finish, a waterproof/breathable membrane, and a lightweight knit interior. No lining. The 3 layers are bonded to become one lightweight fabric to protect you from the elements.

All seams and areas with stitch lines are heat sealed with water-repellent tape.

2.5-layer shell fabric is waterproof, windproof, and breathable. The fabric features a water-repellent finish, a waterproof/breathable membrane, and a partial mesh interior lining.

Main seams and areas with stitch lines are heat sealed with water-repellent tape.

2-layer shell fabric is waterproof, windproof, and breathable. The fabric features a water-repellent finish, a waterproof/breathable membrane, and a tricot or mesh interior lining for added comfort.

Made with yarn that stretches in both directions, crosswise and lengthwise.

Made with quick-drying fabric.

SUSTAINABLE MATERIALS

RECYCLED MATERIALS

A work in progress, we've set a goal to work towards having a line completely made of only fully recycled fabrics in the near future. As we start this journey, our main goal is to do our part in reducing the industry's greater impact one step at a time.

ECO YARN LINING

The first step being the addition of (GRS) certified 100% recycled polyester found in our linings as well as our new high pile fleece, manufactured from used PET bottles. Using environmentally-friendly recycling processes, it does not require petrochemical raw materials and saves natural resources reducing the burden on the environment. We have also switched our nylon lining in 45 of our 48 styles to Ecoya® — a type of solution dyed yarn. Statistics show when generic textiles are replaced with Ecoya®, the release of CO2 and COD is greatly reduced while water and chemicals are also conserved. Such as water savings of 46%, COD savings of 67%, Coal savings of 64%, Chemical savings of 92%, CO2 savings of 63%, Electricity savings of 59%.

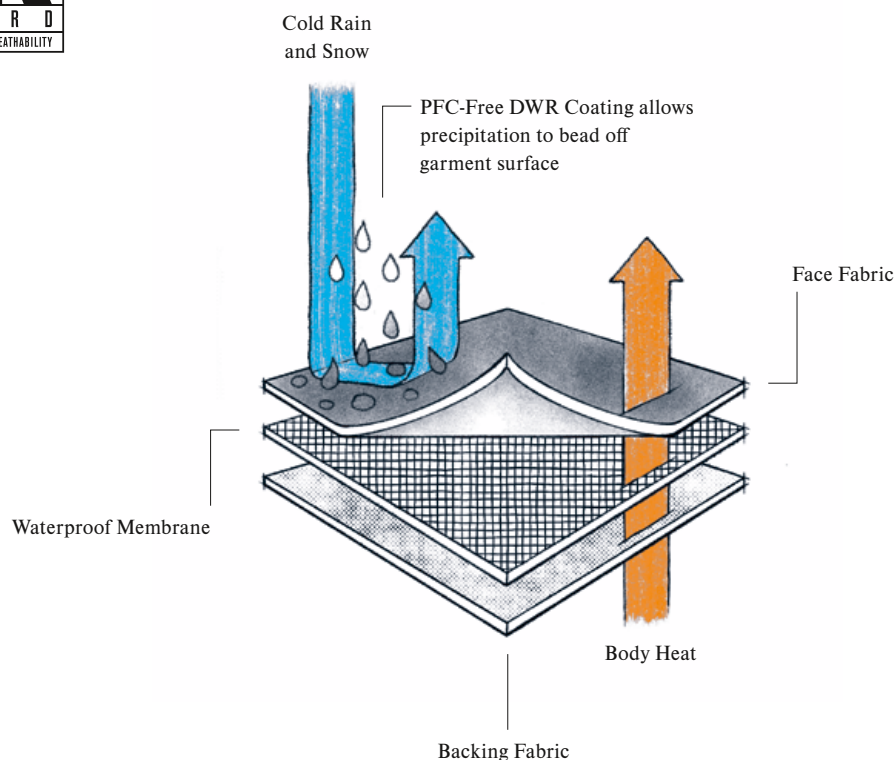

As part of our commitment to improving our environmental footprint we have entirely switched from C6 DWR containing hazardous PFC's (per- and poly-fluorinated chemicals) to PFC-free DWR on all our fabrics and styles that require a DWR coating. The importance of a cleaner textile process is fundamental in our journey to reducing our environmental footprint.

THE 20K STANDARD

Evolving our definition of premium by incorporating 20K/20K as our standard level of waterproofing and breathability through out the vast majority of our line. Premium quality starting with a baseline of high quality weather protection at any price point.

**COMFORT AND DURABILITY THROUGH
PROTECTION AND STRETCH**

NOVA-X is L1's Theorem line's textile fabric solution, which guarantees you the best outdoor experience no matter the weather, winter after winter.

With 20K waterproofing, 20K breathability, and wind protection, NOVA-X shields you from extreme mountain conditions while effectively protecting the fabric's fiber. In addition, the multi-directional stretch reduces stress on the garment while offering premium comfort and the mobility needed to get where you are going.

Our goal is to provide you with the best possible support when snowboarding and the pursuit of garment longevity are our fundamentals for premium and sustainable products. This is why we introduced our NOVA-X fabric solution to the Theorem collection.

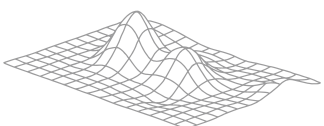

Dustin Craven

THEOREM

L1 PREMIUM GOODS

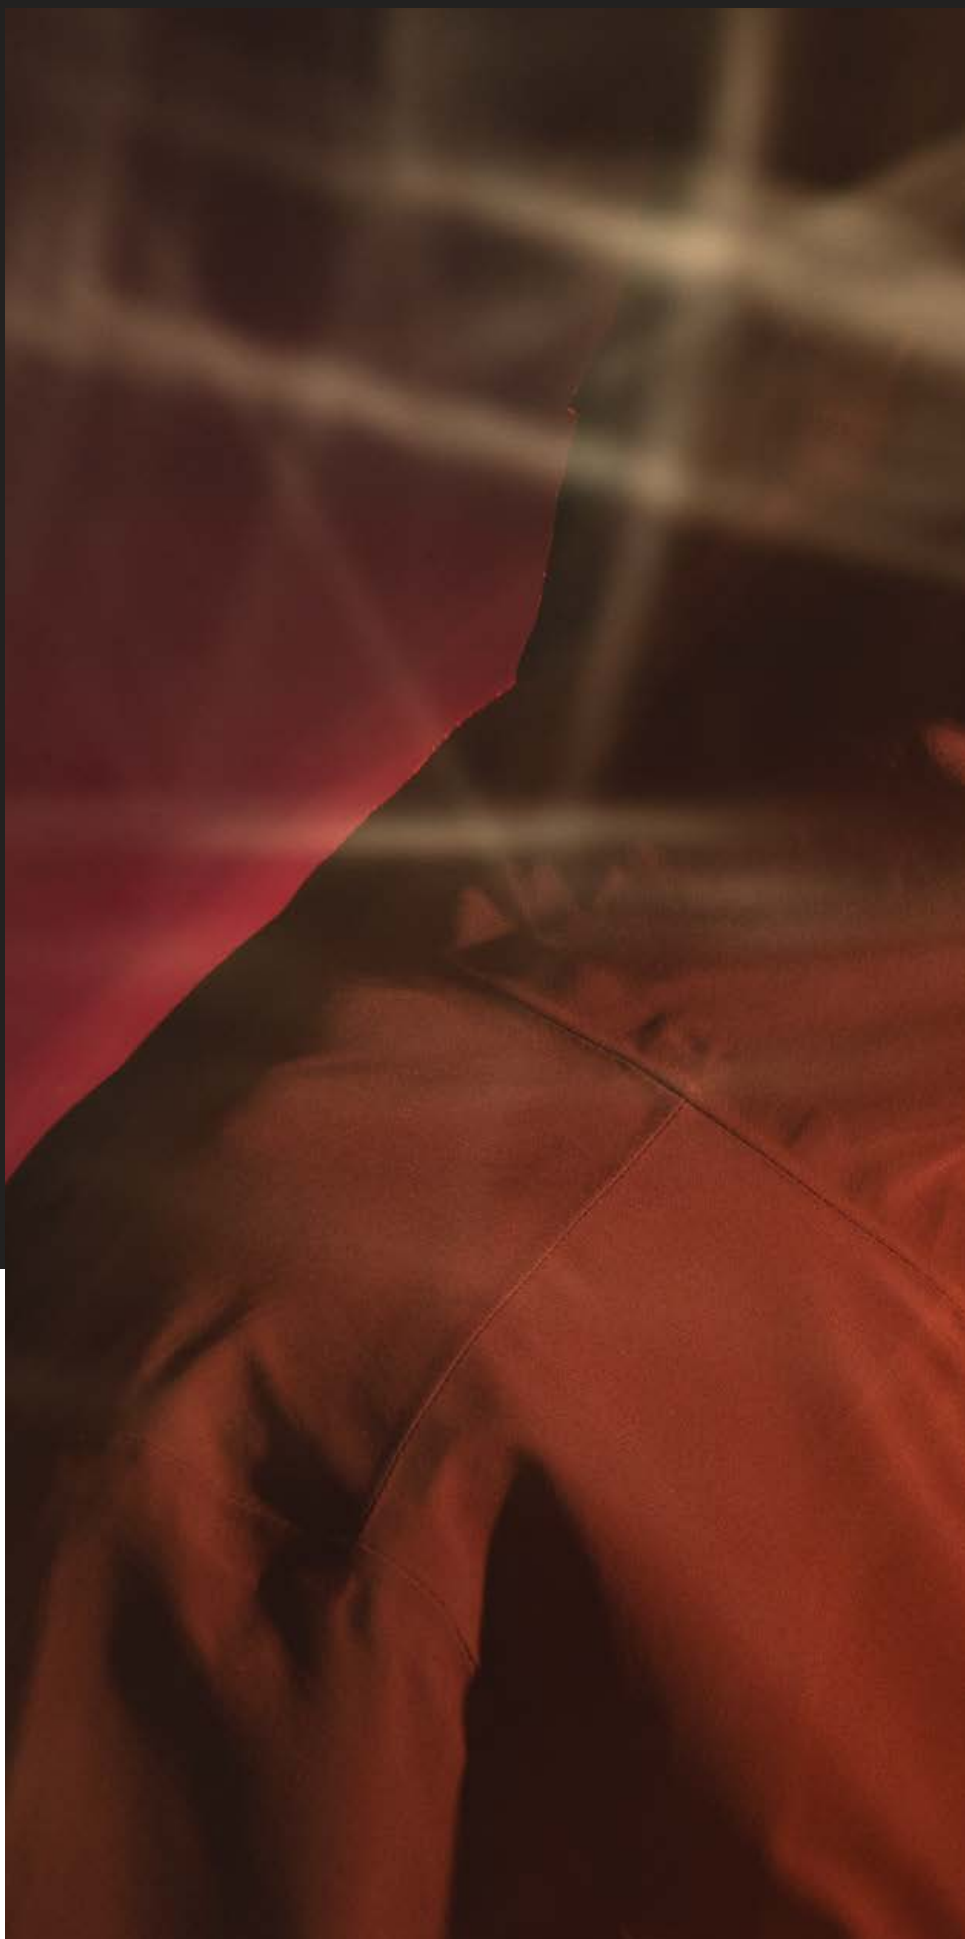

THE EXPERIMENT IN GRAVITATIONAL DISTORTION

This is our fourth season of Theorem, our approach to high performance functional outerwear. Heavily backed by our team riders - Theorem uses premium 3-layer 4-way stretch fabric to create the most functional, waterproof garments in our line.
