LET'S CELEBRATE!

Winter is the inspiration for what we do and so we decided to leave the studio and head for the mountains for the FW19 photo shoot.

A three minute helicopter ride from the shores of Lake Wanaka saw us arrive at a cluster of Geodesic Domes, a high-altitude campsite that would be our home for the next two days.

Life above the snow line is simple; eat, tour, shoot photos and maybe a cheeky wine or beer. For two days we were able to live and breathe skiing and snowboarding. The shoot was special in so many ways, but we will never forget because it celebrated Mons Royale's 10-year anniversary. It was the perfect place to savour the moment, to think back to those early beginnings and to see how far we have come.

We want to say thank you. Thank you to you, our Mons family who have supported us with your passion for the brand and helped us get to where we are today.

So, let's celebrate our love of the mountains with the FW19 range.

HANNAH & HAMISH ACLAND
CO-FOUNDERS, MONS ROYALE

THE FARMER WHO SKIS

Twenty minutes north of the Mons Royale offices in Wanaka is Lake Hawea Station. It is a ZQ certified 6500 hectare, high country farm that looks after 8000 merino sheep. It is run by Angus Rowley, his family have been raising sheep on this land for four generations and he is the farmer who skis.

HOW DID YOUR RELATIONSHIP WITH HAMISH AND MONS START?

I knew who Hamish was because he was in the ski magazines and winning freeride competitions and as a skier I was devouring all of that media, but we hadn't actually met because I was locked in my world of farming and recreational skiing. We got to hang out and as he realised my passion for skiing and growing wool and as I saw his passion for turning wool into Mons Royale we got chatting.

IT SEEMS LIKE A MUTUALLY FULFILLING RELATIONSHIP FOR BOTH PARTIES?

Before we started supplying wool to Mons Royale a lot of our wool went to Italian suit makers, but I just don't give a shit about making a suit. I'm never going to wear that suit, well I might to a wedding. But to produce a garment that I will wear every single day working in the high country and then when I play on the mountain, that's really rewarding.

For years I've been wanting to grow wool for something like this. For true riders and snow enthusiasts and to now see it up on the mountain and people enjoying it, that's an absolute dream.

WHAT DOES IT MEAN TO BE A ZQ CERTIFIED FARMER?

Not everyone can see or feel the difference, but the big difference is in the traceability. ZQ means that you know exactly where your wool comes from. If you've got non-certified wool, you don't know where it's come from and therefore you don't know how it was farmed.

It's about animal welfare, you want an animal to produce as much wool as possible and but it won't do that unless you are looking after it properly. So that is also just good business.

We also have an environmental plan, planting 5000 native trees and fencing off waterways, trying to make it so that farming and conservation can go hand in hand.

WHAT IS MERINO?

Merino are sheep. Not just any sheep, they are incredibly resilient and can survive in harsh geographic environments, which is why they claim to be the oldest farm breed of sheep. In stark contrast to their nature they have the softest fleece that has so many amazing properties it is known as the wonder wool.

BENEFITS OF MERINO WOOL

ANTI ODOUR

The crimped structure of merino fibres means that it is very difficult for bacteria to attach themselves to the wool. As a result, merino garments stay fresher and stink free for longer.

LIGHTWEIGHT WARMTH

Merino wool has a very high warmth to weight ratio, so you stay warm without having to load up on bulky layers. Merino also retains its ability to insulate even when it's wet so no matter how bad the conditions you'll always be warm.

TEMPERATURE REGULATION

Merino acts as a natural air conditioning system because it has the highest moisture absorption capacity of any fabric, so it will keep you warm and dry when it's cold, but by transporting moisture and heat away from the body, it will also keep you cool when it's hot.

BREATHABLE

Its superior ability to absorb and store moisture within its fibres also means that as your body temperature rises the moisture stored in the wool will evaporate away from your body. The warmer you get, the more efficient merino becomes.

SOFT

The fine gauge of merino fibres means it feels super soft next to your skin and won't itch like traditional coarse wools. This level of comfort makes merino perfect for baselayers and underwear.

100% RENEWABLE

Merino wool is 100% biodegradable and sustainable. The sheep are shorn every year in summer to ensure the animals' comfort, health and mobility. The by-product of the shear is the fleece, which we turn into our garments!

ZQ

MERINO

ZQ is a hallmark that certifies a farmer is meeting the highest standards in the areas of animal welfare, environmental care, and social sustainability.

The ZQ Merino programme was launched to help people understand that their textile choices can be a reflection of their beliefs and that Merino, grown the right way, is a smart and sustainable choice.

TRACEABLE

The ZQ merino we use in our Mons Royale garments can be traced directly to the farm it came from.

FIBRE QUALITY

The ZQ process ensures that our wool quality is consistent in tests for whiteness, strength, low variation and contamination.

PEOPLE

ZQ merino growers are bound by their passion and dedication to careful stewardship of the land and the health and safety of those living and working on it.

ANIMAL WELFARE

ZQ merino sheep live free range lives under the 'Five Freedoms', on top of this charter ZQ sheep will never be live shipping, be kept in feedlots or exposed to GMO's.

THIRD PARTY AUDITING

All ZQ growers are assessed and audited by trained and qualified third party auditors from AssureQuality, who visually inspect sheep, farms and facilities to ensure these rigorous standards are met.

ENVIRONMENTAL SUSTAINABILITY

ZQ Merino is sourced only from accredited farmers who meet the highest on-farm standards. ZQ growers pride themselves on best practice in social and environmental responsibility.

HAND SELECTED

Each fleece is assessed in the woolshed by an expert wool classer to ensure only the finest fibres are spun into our yarn.

NO MULESING

Mulesing is not practiced by any ZQ growers and because all of our wool can be traced back to the farm it came from, you can be assured that your Mons Royale merino is 100% mulesing free.

OUR FITS

SLIM FIT

A classic performance baselayer fit. It hugs your form without restricting movement or compromising comfort. Designed to provide the perfect foundation for high output activity, on and off the mountain.

STANDARD FIT

Technical performance doesn't have to mean skin tight, this fit delivers all of merino's inherent benefits in a looser silhouette. This adds the versatility to layer over a slim fit garment where required.

UNDERWEAR

First On. Last Off. Underwear is the foundation of any layering system. Our goal has always been to create beautiful underwear with performance to match and over the last 10 years we've fine-tuned our range to stand out and stand up to any adventure.

BASELAYER

The cornerstone of the Mons range, our baselayers have always been designed with style in mind, but with the addition of a new 250gsm fabric we can claim to produce the most technical and comprehensive range of merino baselayers in the world. There is no substitute.

MIDLAYER

Our innovative and comprehensive midlayer solutions come in lightweight, midweight and pure merino heavyweight. They are warmer, dry faster and are lighter than traditional synthetic fleece. This means they work perfectly as part of a comprehensive layering system.

INSULATION

Warm no matter what. Merino wool insulation is a natural temperature regulator, and will stay warm, even when wet, meaning you can spend the entire day in mountains without fear of the cold. We use natural merino wool in our insulation with a recycled outer to protect you from the elements and keep the impact to our planet to a minimum.

LEGGINGS

Available in three fabric weights with ten years of testing under their extra wide waist bands. Mons leggings are packed with innovative technologies that offer differing degrees of warmth, support and flexibility to suit a vast range of activities and environments.

SOCKS

Mons socks are warm, even when wet, dry quickly and have also cracked the matrix for durability in merino footwear. But most importantly our socks won't smell. Cheesy feet can be funny for precisely 30 seconds before they're unacceptable. With merino you don't have to be that person.

HEAD & NECK

Merino is the perfect fabric for head and neckwear; super soft so it won't itch, odour resistant so your neckwarmer won't smell and as any 6 year old will tell you we lose 80% of our warmth through our head so merino's superior insulating qualities will ensure you stay warm.

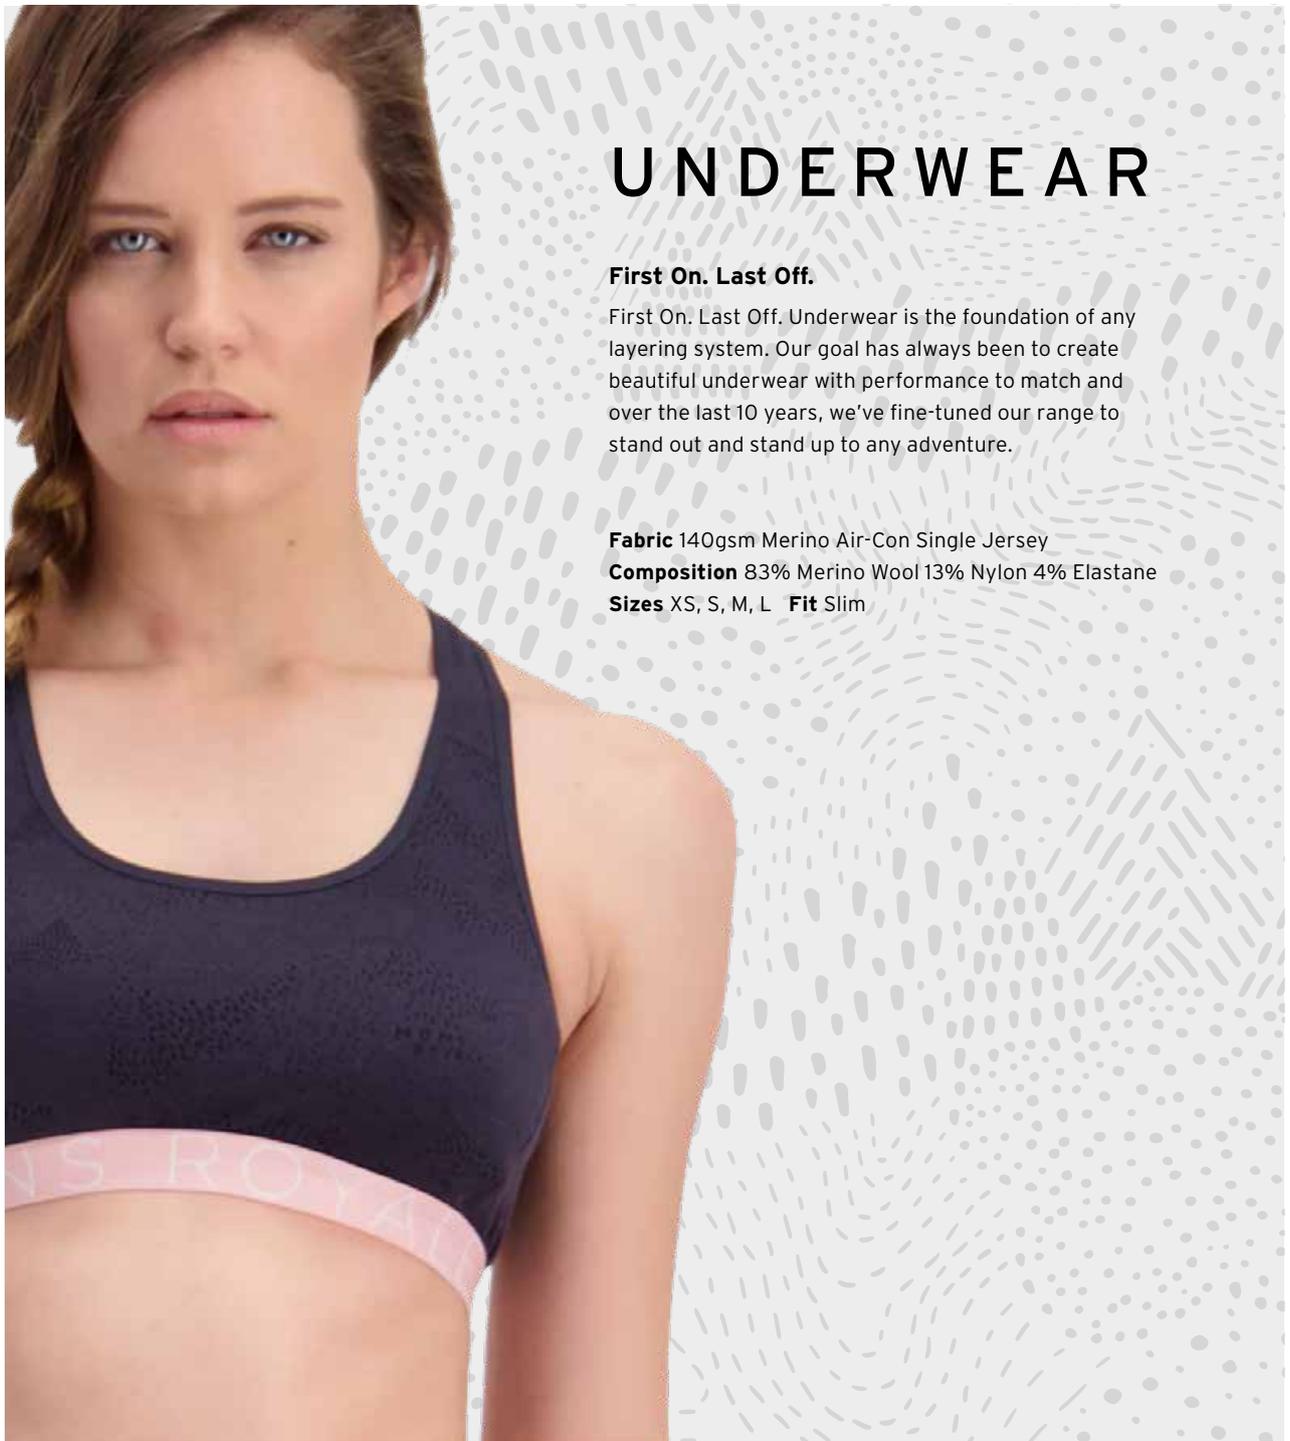

GROMS

We don't prey on parent's insecurities and we don't patronise kids with cheap low tech imitations of our adult products. The Mons Grom range is an exact replica of our most technical pieces scaled down for the next generation of rippers. Plus warm, dry kids means more time on the mountain for mum and dad.

WOMENS

UNDERWEAR

First On. Last Off.

First On. Last Off. Underwear is the foundation of any layering system. Our goal has always been to create beautiful underwear with performance to match and over the last 10 years, we've fine-tuned our range to stand out and stand up to any adventure.

Fabric 320gsm Merino Single Jersey

Composition 100% Merino Wool

Sizes XS, S, M, L **Fit** Relaxed

Available in Corporate Range

- + 320 merino wool regulates your body temperature and naturally resists odour. 100% merino softness
- + Double layer hem band stays in place whilst you move
- + Thumb loops.

INSULATION

Warm no matter what.

Merino wool insulation is a natural temperature regulator, and will stay warm, even when wet, meaning you can spend the entire day in mountains without fear of the cold.

We use natural merino wool in our insulation with a recycled outer to protect you from the elements and keep the impact to our planet to a minimum.

NEW

NEVE INSULATION

With 80gsm merino insulation NEVE is our alpine midlayer that offers sustainable warmth. Unlike down insulation it can shift moisture away from your body quickly and is warm even when wet. Combined with a recycled polyester shell it's the high tech guilt free choice for a midlayer.

Details

47gsm Rip Stop Outer: 45% Recycled Polyester / 55% Polyester

BASELAYER

The cornerstone of the Mons range, our baselayers have always been designed with style in mind, but with the addition of a new 250gsm fabric we can claim to produce the most technical and comprehensive range of merino baselayers in the world. There is no substitute.

TEMPLE TECH

TEMPLE TECH has been designed as an active baselayer for both summer and winter. It's our team riders' first choice for adventures. This is the ultimate baselayer for anyone who likes to test their limits. Combining Merino Air-Con and mesh panels for additional wicking, it's an expert at regulating temperature through any season.

MIDLAYER

Our innovative and comprehensive midlayer solutions come in light, mid and heavyweight merino. They are warmer, dry quicker and are lighter than traditional synthetic fleece. This means they work perfectly as part of a comprehensive layering system.

NEW

TRAVERSE MIDI

TRAVERSE MIDI is our lightest and most advanced midlayer. In fact when you touch it, it feels like a baselayer, but the 200gsm un-brushed merino terry offers the warmth and comfort you want from a midlayer but without the bulk. The cut is slim so will slip invisibly into any layering preference you have, perfect for long days and big missions.

NECKWEAR, HEADWEAR & GLOVES

Merino is the perfect fabric for head and neckwear; super soft so it won't itch, odour resistant so your neckwarmer won't smell and as any six year old will tell you we lose 80% of our warmth through our head so merino's superior insulating qualities will ensure you stay warm.

We don't prey on parent's insecurities and we don't patronise kids with cheap low tech imitations of our adult products. The Mons Grom range is an exact replica of our most technical pieces scaled down for the next generation of rippers. Plus warm, dry kids means more time on the mountain for mum and dad.

OUR DISTINCT FITS

SLIM FIT

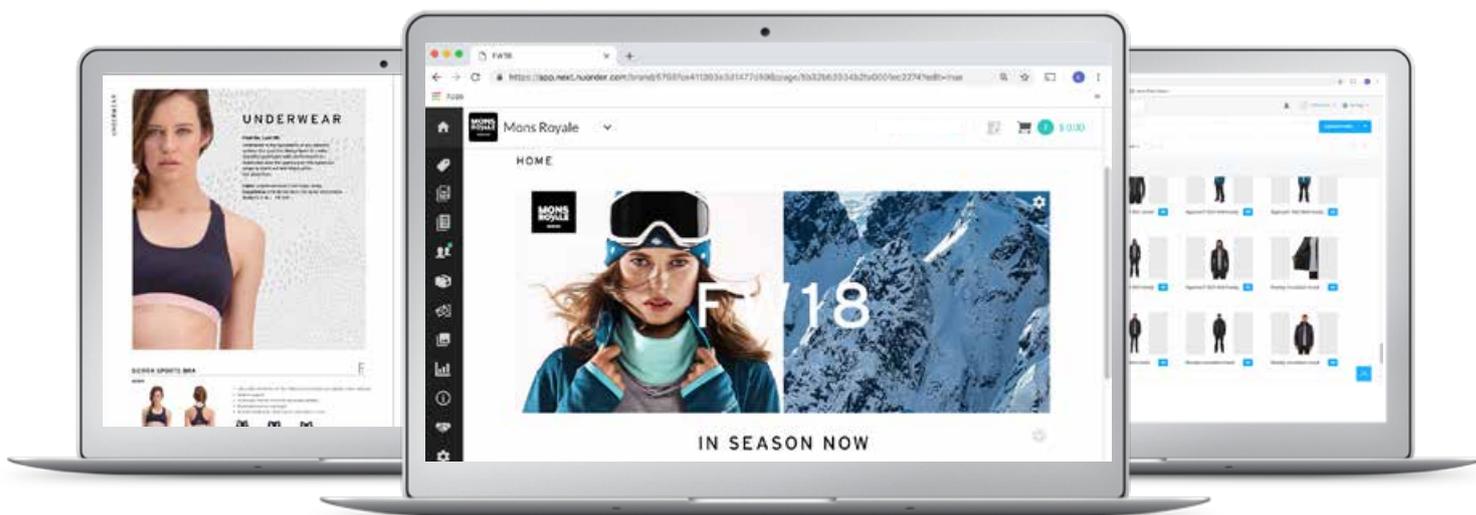

A classic performance baselayer fit. It hugs your form without restricting movement or compromising comfort. Designed to provide the perfect foundation for high output activity, on and off the mountain.

STANDARD FIT

Technical performance doesn't have to mean skin tight, this fit delivers all of merino's inherent benefits in a looser silhouette. This adds the versatility to layer over a slim fit garment where required.

WELCOME TO OUR NEW DIGITAL SHOWROOM

This is our Mons Royale retailer hub, which offers you all the support you need to help sell a range from start to finish. You will have your very own homepage, hosted by NuORDER that will give you 24/7 access to:

ALL DIGITAL SALES TOOLS

Workbook, product images and fit guides.

AN EASY ORDERING SYSTEM

Line sheets / stock availability, suggestions of available stock tailored to your market, instant ordering / reordering, credit apps, terms and pricing.

CAMPAIGN ASSETS:

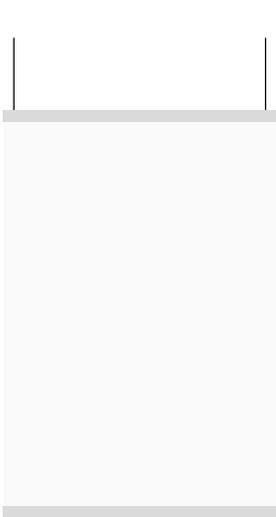

Hi-res images, banner ads, editorial and social content for print and online.

We know that Mons Royale customers are digital natives, so we work hard to ensure our products present beautifully online. This platform gives you direct access to all of those assets to share with your customers via your own channels.

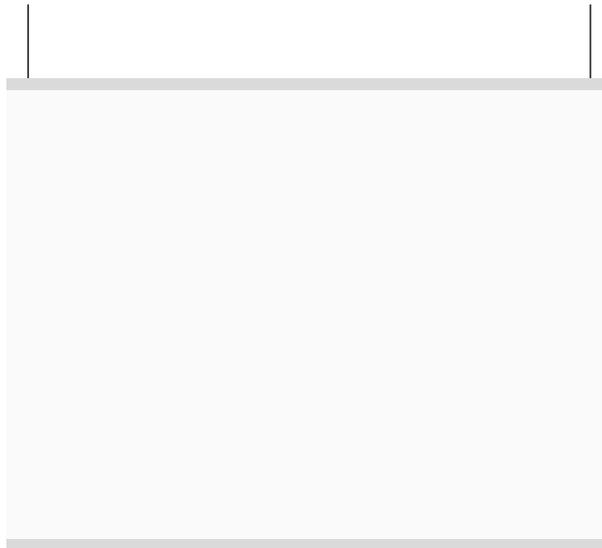

RETAIL & MERCHANDISING

With a comprehensive suite of sales and marketing support material, it's easy to sell Mons Royale online or instore
